

FIRMWARE UPDATE RELEASE DETAILS

GEO 2

WATCH DIVE COMPUTERS

to version 1i

(from previous version 1H)

EXPLANATION

In response to input received from staff and users of the GEO 2, Oceanic has corrected or modified the following items to improve the GEO 2's operation:

- Corrected the return to Watch Main operation that did not function properly when M was pressed for 2 seconds while Set ALT (Alternate) Time was displayed.
- Enabled Set FA3 (Free Depth Alarm # 3) that was blocked after a dive in FREE mode.
- Modified Set ALT (Alternate) Time which remains as set until changed, and is based on Home Time.

UPDATE PROCESS

Units affected are the GEO 2 model containing previous firmware version 1H.

You can update your GEO 2's firmware (operating software program) to newly released revision 1i using the *Check for new Firmware Update* feature of the current version of the OceanLog PC interface program or Diverlog Mac interface APP. There is no need to return the GEO 2 unit to Oceanic.

*OceanLog and Diverlog information is available on the
www.oceanicworldwide.com web site.*

Should you have any questions, please contact your Authorized Oceanic Dealer, or Oceanic Customer Service by calling 800-435-3483 (8AM -5PM, PST Monday - Friday) or send an email to service@oceanicusa.com.
